MY PORTFOLIO
I am Karan

TECHNICAL SKILLS

Core Languages

TypeScript JavaScript (ES6+) SQL

HTML5/CSS3

Frontend

Next.js (App Router) React.js Redux Toolkit

RTK Query Redux Persist Tailwind CSS

Ant Design Styled Components

Framer Motion Recharts Vite

Backend & Server-Side

Next.js Server APIs Server Actions

Route Handlers RESTful APIs Crawlee

Cheerio Firecrawl

Databases & Auth

PostgreSQL Supabase (Auth / RLS)

Neon DB MongoDB OAuth 2.0 2FA/JWT

Cloud & Integrations

Stripe Billing OpenRouter AI OpenAI

Google Gemini AI Firebase (FCM)

DataForSEO Git/GitHub Brevo Vercel

Tools & AI Assistants

Claude Code Cursor Antigravity Replit

Lovable

CORE COMPETENCIES

- Full-Stack SaaS Product Architecture
- Multi-Tenant System Design
- PostgreSQL Row Level Security (RLS)
- Stripe Subscription & Billing Flows
- AI Model Integration & Pipelines
- Automated Web Crawling Engines
- State Management & Performance Tuning
- Role-Based Access Control (RBAC)

EDUCATION

Master of Computer Applications (MCA)

Guru Nanak Dev University, Amritsar
CGPA: 8.09/10.0 | 2021-2024

BSc Computer Science

Baring Union Christian College, Batala
Score: 67% | 2018-2021

LANGUAGES

- English (Professional Working)
- Hindi (Native / Bilingual)
- Punjabi (Native / Bilingual)

KARAN KUMAR

Full-Stack Developer · Next.js · React · TypeScript · PostgreSQL · Supabase · AI Integration

Full-Stack Developer with a proven record of architecting and shipping production-grade SaaS platforms and AI-powered web applications. Expert in end-to-end Next.js development server-side APIs, Server Actions, and Route Handlers combined with reactive React/TypeScript frontends. Specialized in multi-tenant database architecture, PostgreSQL/Supabase Row Level Security, Stripe billing integration, automated web crawling pipelines, and delivering scalable products in fast-paced startup environments.

PROFESSIONAL EXPERIENCE

Sunfocus Solutions Pvt. Ltd. — Full-Stack Developer

Jan 2025 – Present · Punjab, India

- Architect and build production-grade SaaS platforms and admin portals using Next.js, React, TypeScript, PostgreSQL, and Supabase end-to-end from design to deployment.
- Design secure Server Actions, Route Handlers, database schemas, and Row Level Security (RLS) policies; integrate Stripe billing, AI pipelines, and Firebase Cloud Messaging.
- Own full deployment pipelines on Vercel and Supabase optimizing data fetching, caching strategies, and resolving critical production issues under tight deadlines.

Sunfocus Solutions Pvt. Ltd. — Full-Stack Developer Intern

Jul 2024 – Dec 2024 · Punjab, India

- Built full-stack features using Next.js, React, TypeScript, and MongoDB; developed server-side API routes for authentication, session management, and data persistence.
- Engineered reusable component libraries and implemented responsive UI layouts adhering to design system standards and performance best practices.

KEY PROJECTS & PRODUCTION PLATFORMS

SYNCRO — Creator Monetization & Growth Platform

Independent Project

syncro.net.in

Stack: Next.js, React, TypeScript, Tailwind CSS, Ant Design, Redux Toolkit, Stripe, AI Integrations, REST APIs

- Built responsive creator dashboards and workflows spanning storefronts, digital products, courses, bookings, lead capture, and subscription monetization with Stripe checkout flows.
- Developed social media automation interfaces, cross-platform content publishing workflows, and AI-powered creator insights, growth analytics, and content recommendation tools.

BirthFlow — Full-Stack Doula Care & Agency Platform

birthflowapp.com

Sunfocus Solutions Production SaaS

Stack: Next.js, React, TypeScript, PostgreSQL, Neon, Supabase, Vercel, OpenAI, Google Calendar API, Tailwind CSS

- Built full-stack Next.js SaaS managing doula client journeys from intake through pregnancy timelines, dynamic forms, cervical vitals labor tracking, and postpartum workflows.
- Engineered Neon PostgreSQL schemas, Supabase real-time sync, backup doula coordination with Google Calendar sync, and OpenAI communication assistants.

SossRank — AI SEO & Local Business Optimization

app.sossrank.com

Sunfocus Solutions Production SaaS

Stack: Next.js, React, TypeScript, PostgreSQL, Supabase, Stripe, OpenRouter AI, Crawlee, Cheerio, Firecrawl, DataForSEO, Brevo, Tailwind CSS

- Independently architected the full-stack SaaS platform database schema, Next.js server-side APIs, automated crawling pipelines (Crawlee, Cheerio, Firecrawl), and production deployment.
- Implemented multi-model AI workflows via OpenRouter for audit generation, automated Brevo email alerts, and recurring Stripe billing for tiered SEO reporting plans.

Market Ember — Multi-Tenant Business Administration

Live Mobile App Admin Ecosystem

Sunfocus Solutions Production Platform

Stack: Next.js, React, TypeScript, Supabase, PostgreSQL, Redux Toolkit, Redux Persist, Firebase Cloud Messaging, Recharts, Ant Design, Tailwind CSS

- Built a multi-tenant admin portal with Next.js Middleware RBAC, Supabase Auth, territory management workflows, Recharts analytics dashboards, and Firebase Cloud Messaging notifications.
- Engineered real-time data sync across mobile operations, role-based resource permissions, and optimized persistent state handling with Redux Toolkit and Persist.

DocBot.One — AI Conversational SaaS Platform

Sunfocus Solutions Production SaaS

docbot.one

Stack: React, TypeScript, Vite, Redux Toolkit, Redux Persist, Styled Components, Ant Design, Framer Motion, Stripe

- Built AI chat interface with prompt editing, response regeneration, multi-tenant team management, token tracking dashboards, 2FA auth flows, and Stripe subscription billing integration.
- Designed smooth Framer Motion micro-interactions, responsive sidebars, and client-side token consumption tracking for high-volume enterprise document querying.

Vora — AI Fashion & Style Analysis Platform

Personal Project

Stack: Next.js, React, TypeScript, Google Gemini AI, Redux Toolkit, RTK Query, Tailwind CSS, Framer Motion

- Built an AI fashion app using Gemini vision models for image-based outfit analysis and personalized styling recommendations; implemented OAuth authentication and RTK Query state caching.
- Engineered automated wardrobe breakdown tagging, outfit match scoring algorithms, and seamless media uploads optimized for fast mobile rendering.
